Why Hot Weather Can Affect People with Special Needs

Hot weather can be harder for some people. Here's why – and how we can help.

- Harder to regulate body temperature**
Some conditions or medications can make it harder to cool down.
- Sensory overload**
Heat, bright sun, noise and crowds can feel overwhelming.
- More fatigue**
Heat can cause tiredness, irritability and low energy.
- Higher risk of dehydration**
Some may not recognise thirst or communicate it.
- May impact behaviour and emotional wellbeing**
Discomfort can lead to anxiety, meltdowns or shutdowns.

Small adjustments can make a big difference. Stay cool. Be kind. Be understanding.
